

NorthAble - Disability Services

NorthAble is contracted to provide a DIAS (Disability, Information and Advisory Service), NASC (Needs Assessment and Service Co-ordination Service), & a VHN (Very High Needs Service) throughout Northland Te Tai Tokerau, and a Community Participation & Vocational Programme known as LYNKZ in Whangarei. There is also a user pays LYNKZ programme in Dargaville

Services Provided

DIAS NorthAble is 'Your First Stop' for Disability Information and Service. Our aim is to link you to information and services that can support and empower you.

NASC is for people aged 0 to 65 years who have an intellectual, physical, or sensory disability, or a combination of these, where the disability is likely to continue for a minimum of six months and result in a reduction of independent functioning. Upon receiving a referral, NASC will determine eligibility for MoH funded support services, undertake an assessment, identify strengths and support needs. A Service Coordinator then works with the person/whanau to explore how individual needs can be met within the services available. NASC can also provide information on Individualised Funding and Family Funded Care.

LYNKZ is a Community Participation programme incorporating Vocational Support providing life skills such as cooking and social activities. LYNKZ is for people living with a physical, intellectual or sensory disability who are 16-64yrs of age. The Whangarei programme is funded by the MSD. A "user pays" programme is offered in Dargaville.

VHN is an individual vocational and community participation service for people 16 - 64yrs with Very High Needs, as assessed by the Ongoing Resourcing Scheme (ORS).
