

# Tiaho Trust - DisAbility - A Matter of Perception

Tiaho Trust provides disability information, advocacy and advisory support services within the Northland region and is based in

## TIAHO PROFILE:

Tiaho Trust is a proactive organisation providing advice, education and support to develop communities that are inclusive of disabled people and values their contribution.

The collaborative approach Tiaho Trust adopts in all its undertakings ensures that disabled people are leaders and participants in work that is about them.

As a 'disabled led' organisation, Tiaho Trust is strongly focused on representing the issues and views of the disabled community in Tai Tokerau.

## HOW DO WE DO THIS?

Tiaho works collaboratively with disability providers, community based organisations and local and regional government bodies on projects that promote the value and inclusion of disabled people in our communities.

We have a representative role on a range of local government and agency committees/panels in Northland to ensure that the disabled community has input into the services that affect them.

Our website [www.tiaho.org.nz](http://www.tiaho.org.nz) provides the Northland community with current news and information relating to disability. To educate and create discussion around disability issues, you can make a comment on any articles posted.

There are many specialist (DIAS) Disability Information Advisory Service providers working hard in our community to support people with disabilities, their family/whanau and carers.

These organisations belong to the Northland DIAS Collective which Tiaho Trust supports.

You can access their contact details and 'virtually' meet the people within these organisations by visiting our home page and clicking on 'Support Network'.

If you want to know what events and support groups are happening in Northland you can check these out at [tiaho.org.nz/about/events\\_calendar](http://tiaho.org.nz/about/events_calendar).

Tiaho Trust provides specialist disability responsiveness training to both the public and private sector on how to provide exceptional service to disabled and mature service users.
