

About Us

We are New Zealand's leading provider of vision rehabilitation, providing practical and emotional support for people with vision loss. Our vision rehabilitation services are personalised to meet your individual needs and goals, however big or small. To become a client, you need to register for our services. Once you're set up, you'll be able to access a wide range of support.

Services

Our services are free. We can also help connect you with other funding, including:

- the Total Mobility transport subsidy
- job and study support funds
- discounted St John Medical alarms
- hearing aid funding

Some people experience both vision and hearing loss. If that's you, or someone you know, our deafblind services are here to help - wherever you are in Aotearoa.

Resources

Our Library Service offers books and resources in many accessible formats. These can be accessed via the Blind Low Vision NZ Library skill on Amazon Alexa, the EasyReader app, or by calling our Contact Centre.

We can also help with:

- getting around safely and freely
- daily living skills
- sport and leisure
- peer support
- using tailored technology

Personalised Support

Blindness and low vision are more common than many people realise and can affect anyone at any stage of life. We support people whose limited or reduced vision makes everyday activities difficult, even when they use the best available glasses or contact lenses.

Because everyone experiences sight loss differently, we work closely with each person to find practical solutions that suit their individual needs, circumstances and goals. Our support is personalised to help each person remain confident, connected and as independent as possible.
